- VS Code
- REST APIs

CORE COMPETENCIES

- Problem Solving
- Database Design
- Responsive Web Design
- AI API Integration
- Debugging & Testing

LANGUAGES

- English
- Hindi

ABOUT ME

Third-year B.Sc. Computer Science student (TYBCS, currently pursuing) focused on full-stack web development. Interested in building practical web applications using React, Node.js, Express.js, and modern frontend tools. Hands-on project experience includes college workflow systems, travel websites, management applications, and an AI-powered college chatbot.

EDUCATION

Bachelor of Science in Computer Science (TYBCS) Currently Pursuing

K.J. Somaiya College, Kopargaon | 2024 2028 (Expected)

FYBCS: Sem 1 9.45 SGPA | Sem 2 9.27 SGPA

SYBCS: Sem 3 8.36 SGPA | Sem 4 9.09 SGPA

PROJECTS

College Desk Portal Inward/Outward Management System

React.js, Vite, Tailwind CSS, Node.js, Express.js, SQLite

Built a college document-management system for recording inward and outward letters, searching records, and generating date-wise and combined reports. Includes Admin and Desk Operator roles, JWT authentication, file uploads, audit logs, and backup/restore features.

Peace Travel

Web Development

Travel-focused website project designed to present travel information and make it easier for visitors to explore travel-related services.

Tours and Travel Website

Web Development

Developed a travel website concept with organized travel content and a user-friendly interface for browsing tour-related information.

Online Attendance Management System

Web Application

Project focused on digitizing attendance records and making attendance information easier to maintain and review.

Star AI College Assistant Chatbot

Python, Flask, HTML, CSS, REST API

Built an AI-powered college chatbot to answer student queries about college facilities, staff, classrooms, and academic information, with basic offline response support.

Team Star Management System

HTML, CSS, JavaScript, Python, SQLite

Developed a web application to manage sports teams, members, tournaments, match tracking, and team funds.
